

| A. GENERAL I | INFORMATION |
|--------------|-------------|
|--------------|-------------|

| PRODUCT NAME | | | C.A.S. NO |
|---|---------------------------------|-----------------------------|----------------------|
| Urea-Formaldehyde Bonded Wood Pr | oduct (Particleboard) | | N.A |
| TRADE NAME | | | |
| Commercial Grade, Premium Industria | al Particleboard, SUPER SHEI | _F™, SUPER STEP™ | |
| DESCRIPTION | | | |
| This panel product is manufactured from | om particles and fibers of wood | d bonded together with urea | -formaldehyde resin. |
| MANUFACTURER/DISTRIBUTOR | PHONE NUMBER | SUPERSEDES DATE | EFFECTIVE DATE |
| Boise Cascade Corporation | (208) 384-6610 | 07/01/88 | 04/01/96 |

B. FIRST-AID MEASURES

| INHALATION | EYE CONTACT | SKIN CONTACT | INGESTION |
|--------------------------------|--------------------------------------|----------------------------|--------------------|
| Remove to fresh air. If | Remove contact lenses (if | Wash affected areas with | Not applicable |
| persistent irritation, severe | applicable). Flush eyes, including | soap and water. If rash or | under normal |
| coughing or breathing | under eyelids, with large amounts of | persistent irritation or | conditions of use. |
| difficulty occurs, get medical | water. Remove to fresh air. If | dermatitis occurs, get | |
| attention. | irritation persists, get medical | medical attention. | |
| | attention. | |] |

C. HAZARDOUS INGREDIENTS (Mixtures Only)

| MATERIAL OR COMPONENT | C.A.S. # | PERCENT |
|---|----------|----------------|
| Formaldehyde | 50 0-0 | 0.1% by weight |
| Wood Dust (soft and most hazardous, except Western Red Cedar, Beech, and Oak) | N.A. | |
| Certain Hardwood (i.e., Beech and Oak) | N.A. | |

D. PHYSICAL HAZARDS INFORMATION

| FLASH POINT | AUTO IGNITION TEMPERATURE | FLAMMABLE LIMITS IN AIR (% BY VOL.) | |
|----------------------|--|--|---------------------------------|
| N.A. | Dependent upon duration of exposure to heat source and other variables. 400° - 500°F(204° - 260°C) | An airborne concentration of 40 grams of dust per cubic meter of air is often used as the lowest explosion limit (LEL) for wood dust. Formaldehyde LEL 7% UEL 73% | |
| SPECIAL FIREFIGHTING | G PROCEDURES | 1 | SPECIAL FIREFIGHTING PROCEDURES |
| Burns like other we | ood products, although it is dangerous | and may burn hotter. Partially | Water, carbon dioxide, |

Reactivity

CONDITIONS CONTRIBUTING TO INSTABILITY

Stable under normal conditions. Wood dust generated from sawing, sanding, or machining the product is extremely combustible. Keep in cool dry place away from ignition sources.

INCOMPATIBILITY (Materials to avoid)

Avoid contact with oxidizing agents and drying oils. Avoid open flame.

HAZARDOUS DECOMPOSITION PRODUCTS

Thermal-oxidation degradative or burning of wood can produce irritating and potentially toxic fumes and gases, including carbon monoxide, aldehydes and organic acids.

E. HEALTH HAZARDS INFORMATION Standards

| COMPONENT | OSHA PEL1 | ACGIH TLV |
|--|--|--|
| Formaldehyde | 0.75 ppm TWA | Formaldehyde - STEL 0.3 ppm |
| (0.1% by Weight) | 2.0 ppm STEL 0.5 ppm Action Level | Wood Dust: Nonallergenic and noncarcinogenic - 2 mg/m3 |
| Wood Dust (Particulates Not Otherwise Regulated) | 5.0 mg/m³ (Respirable Fraction) 15.0 mg/m³ (Total) | Other respiratory Allergenic wood dust - 1 mg/m3 |

| INHALATION | Gaseous formaldehyde may cause temporary irritation to the nose and throat. Wood dust may cause nasal dryness, irritation, coughing, and sinusitis. Repeated exposures (even below 5 mg/m³) to certain wood dusts, such as Western Red Cedar, can produce allergic responses in some sensitive individuals. |
|-----------------|---|
| SKIN CONTACT | Both formaldehyde and various species of wood dust may evoke allergic contact dermatitis in sensitized individuals. |
| SKIN ABSORPTION | N.A. |
| EYE CONTACT | Gaseous formaldehyde may cause temporary irritation or a burning sensation to the eyes. Wood dust can cause mechanical irritation. |
| INGESTION | Not applicable under normal conditions of use. |

TOXICOLOGICAL INFORMATION

WOOD DUST: Wood dust may cause nasal dryness, irritation, and obstruction. Coughing, wheezing, and sneezing; sinusitis and prolonged colds have also been reported.

Depending on species, may cause respiratory sensitization and/or irritation. Wood dust is not considered a potential cancer hazard by OSHA. The National Toxicology Program (NTP) and the International Agency for Research on Cancer (IARC) classifies wood dust as a carcinogen to humans (Group 1). This classification is based primarily on IARC's evaluation of increased risk in the occurrence of adenocarcinomas of the nasal cavities and paranasal sinuses associated with exposure to hardwood dust. IARC did not find sufficient evidence to associate cancers of the oropharynx, hypopharynx, lung, lymphatic and hematopoietic systems, stomach, colon, or rectum with exposure to wood dust.

FORMALDEHYDE: May cause temporary irritation to eyes, nose and throat. Some reports suggest that formaldehyde may cause respiratory sensitization, such as asthma, and the preexisting respiratory disorders may be aggravated by exposure.

Formaldehyde is listed by IARC as a probable human carcinogen. The NTP includes formaldehyde in the Annual Report on Carcinogens. Formaldehyde is regulated by OSHA as a potential cancer agent.

In studies involving rats, formaldehyde has been shown to cause nasal cancer after long-term exposure to very high concentrations (14+ ppm), far above those normally found in the workplace using this product.

The National Cancer Institute (NCI) conducted an epidemiological study of industrial workers exposed to formaldehyde (published June 1986). The NCI concluded that the data provides little evidence that mortality from cancer is associated with formaldehyde exposure at the levels experienced by workers in the study.

¹Wood dust is now officially regulated as an organic dust under the Particulates Not Otherwise Regulated (PNOR) or Inert or Nuisance Dust categories at PELs of: TWA - 15.0 mg/m³ (total dust); 5.0 mg/m³ (respirable fraction).

F. PHYSICAL DATA

| MATERIAL IS (AT NORMAL CONDITIONS) | APPEARANCE AND ODOR: | | |
|------------------------------------|--|--------------------------------|--|
| "LIQUID X'SOLID "Gas | Light to dark tan. Color and odor are dependent upon wood species. | | |
| | PHYSICAL STATE: | Solid | |
| | BOILING POINT: | N.A. | |
| | SPECIFIC GRAVITY (H ₂ 0=1): | á1.0 | |
| | EVAPORATION RATE (Butyl Acetate=1): | N.A. | |

G. SAFE HANDLING AND USE Personal Protective Equipment

RESPIRATORY PROTECTION (TYPE)

Wear NIOSH/OSHA-approved respirator when the allowable OSHA exposure limits to wood dust and/or formaldehyde may be exceeded.

EYE PROTECTION

Recommend goggles or safety glasses as conditions indicate when sawing, sanding, or machining wood products SKIN PROTECTION

Other protective equipment, such as gloves and outer garments, may be needed to reduce skin contact. Wash affected area of the body after contact with dust

OTHER CLOTHING AND EQUIPMENT

N.A.

Engineering Controls

VENTILATION REQUIREMENTS

Provide local exhaust, as necessary, to meet OSHA requirements for wood dust and formaldehyde exposure

OTHER TYPES OF ENGINEERING CONTROLS

Due to the explosive potential of wood dust when suspended in air, precautions should be taken during sanding, sawing, or machining of wood products to prevent sparks or other ignition sources in ventilation equipment.

Storage

STORAGE REQUIREMENTS AND PRECAUTIONS

Provide adequate ventilation to reduce the possible buildup of formaldehyde gas, particularly when high temperatures occur. Avoid dusty conditions and provide good ventilation. PF-bonded wood products should not be stored where exposure to water could occur. Wood products are combustible and, therefore, should not be subjected to temperatures exceeding the autoignition temperature.

H. ENVIRONMENTAL

Disposal, Spill, or Leak Procedures

ACCIDENTAL RELEASE MEASURES

Not applicable for product in purchased form. Sweep or vacuum dust for recovery or disposal. Wood dust cleanup and disposal activities should be accomplished in a manner to minimize creation of airborne dust.

*Appropriate Regulatory Agencies should be notified in the event of an accident.

NEUTRALIZING CHEMICALS AND WASTE DISPOSAL METHODS

This product is not considered hazardous waste under Federal Hazardous Waste Regulations 40 CFR 261. State and local requirements for waste disposal may be different from federal regulations. Incinerate or landfill in accordance with local, state, and federal regulations.

HAZARDOUS WASTE DESIGNATION

N.A.
